

InBoxer Anti-Risk Appliance

High Performance Email and IM Archiving Reduces Litigation and IT Operational Costs

The InBoxer® Anti-Risk Appliance 3000 series is an intelligent archiving and retrieval system that speeds up investigations, reduces litigation costs, manages policy risks, and cuts IT operational expenses.

In addition to accurately copying, indexing, and storing your critical electronic messages, InBoxer is optimized to reduce searching and retrieval time, which translates to lower costs. We accomplish this in several ways:

- Our exclusive Pre-Search™ technology can produce results in seconds for more than 80 of the most frequently searched items, including senders, recipients, social security numbers, confidential data, medical content, and offensive language.
- InBoxer's state-of-the-art searching technology enables you to find exactly what you need without wasting time. All messages are indexed in real-time and are immediately ready for searching. Capabilities include powerful exact, phrase, fuzzy and proximity searches with compound Boolean expressions.
- The high performance, energy-efficient, Appliance is based on the latest Intel® Xeon® 5500 series processors, to provide exceptional archiving and retrieval capabilities.

The InBoxer Anti-Risk Appliance is a fully integrated solution that includes compliance, litigation hold, and policy management features in a single, easy-to-use, browser-based interface. It arrives fully configured at your facility and typically takes less than an hour to install.

A full year of RedGlove™ service is included with the model 3000. It provides software installation, on-site next day hardware support*, basic software support, GoTheDistance™ Software Updates and GoTheDistance Active Monitoring Service, that can remotely identify and solve issues before they become problems.

InBoxer hardware is EPA Energy Star certified to protect the environment and further lower costs through superior energy efficiency.

Our exclusive Pre-Search technology speeds results for more than 80 of the most useful searches.

Integrated Compliance and Litigation Hold capabilities make it easy to produce and export the results you need, even under tight deadlines.

Build simple or complex searches with powerful fuzzy and proximity search commands.

Create real-time alerts for policy management or schedule updates for any search.

InBoxer Anti-Risk Appliance

Features

ARCHIVED MESSAGE TYPES:

- Archives multiple servers and multiple message types simultaneously.
- Microsoft Exchange, IBM Lotus Domino, First Class, Kerio, UNIX POP3, and more
- Bloomberg Messaging, AIM, Yahoo IM, Google Talk, ICQ, IBM Lotus Sametime, Windows LiveMessenger, and more*

ARCHIVE CAPABILITIES:

- Reliable "never miss a message," low overhead, journal based copies
- Message compression
- Single instance message storage
- Time-based retention schedule

SEARCH CAPABILITIES:

- Pre-Search advanced language technology speeds retrieval of the 80+ items searched most often, e.g., senders, recipients, social security numbers, confidential information, and offensive content.

- Full text index of the entire message, including body, headers, metatext, and attachments.
- Search text in any attachment, including Microsoft Office, PDF, ZIP files, and more.
- Search key words and phrases using:
 - Exact match
 - Single or multiple character wildcards
 - Boolean expressions
 - Proximity search (within x words)
 - Fuzzy search (similar spelling)
 - Complex, multi-step search
- Saved searches: Run a search once and set it to run again at defined intervals.

BUILT-IN DATA PROTECTIONS:

- On-board mirrored (RAID 5 or 6) storage
- Automated second copy to existing network backup or WORM (optical) storage*
- Unlimited expansion via SAN or iSCSI
- Optional off-line copy at Safecore's secure hosted storage facility
- Two 2-port high speed Gigabit NICs
- Dual power supplies (most models)

LITIGATION SUPPORT

- Fully integrated litigation hold
- Message tagging and reviewer notes
- Export in industry standard format for use by case management software
- Audit trail

COMPLIANCE AND REAL-TIME ALERTS:

- Policy based, real-time monitoring
- Automated warnings to sender, recipient or management for policy violations
- Random sampling and review
- Pre-defined policy categories (80+)
- Customer defined policy categories for watch list, key word, domain, and more

INBOXER EXCLUSIVES:

- Pre-Search for ultra-fast retrieval
- GoTheDistance Software Updates, includes all updates and new versions
- GoTheDistance Active Monitoring remotely diagnoses and solves problems
- RedGlove™ on-site hardware support*
