

Research shows that more than 70% of a typical company's intellectual property resides in e-mail and instant messages.

Manage Your E-mail. Protect Your Intellectual Property.

SafecoreMA

The industry's most comprehensive, hosted message management, archiving and eDiscovery solution

Safecore delivers secure, scalable, Digital Archives to capture, analyze, archive and deliver the eRecords needed by our clients to effectively operate their businesses, stay in compliance with regulations, reduce legal eDiscovery costs and manage large message environments.

- SafecoreMA's integrated system allows authorized users to search and review both e-mail and IM histories from a single interface.
- SafecoreMA acts as a secure, long-term message communications repository, with advanced cross-archive searching and retrieval capabilities.
- SafecoreMA dramatically reduces the ongoing cost of e-mail and instant message storage.
- SafecoreMA is designed to meet any eDiscovery request and provides true life-cycle management of eRecords including required "Legal Holds."
- SafecoreMA's flexible design allows clients to meet any retention times and adjust by user groups.
- SafecoreMA moves email off our client's network and into their Digital Archive at Safecore, increasing network resources and alleviating network traffic.
- SafecoreMA adheres to our client's security and privacy policies including 3rd party audits. Safecore is a member of Safe Harbor, demonstrating our commitment to best practices for global data privacy.

SafecoreMA Tool Box

SafecoreMA Archiving

- Automatically archives electronic messages based on flexible policies and advanced indexing
- Administrative search and retrieval can be based on date, time, sender, receiver, type, status, group, or indexed entities in the header, body, or any attachment
- Ability to flexibly manage the retention period of all messages and attachments

SafecoreMA eDiscovery

- Enables the investigation of the message archives created by SafecoreMA
- Offers efficient, high-volume searching and document production capabilities for fast, easy, and user-friendly retrieving, reviewing, and exporting of archived messages

SafecoreMA Compliance

- Satisfies SEC Rule 17a-3, 17a-4 Archiving Requirements, NASD Rule 3010(d), and NYSE Rule 342
- Satisfies Sarbanes-Oxley Section 103(a), Section 801(a), Section 104(a), Section 501(a), Section 105(b), and Section 301(4)
- Complies with HIPAA, Gramm-Leach-Bliley, CFTC, CFR(II), Federal Rules Civil Procedure (FRCP) and more
- Uses 3,300+ SEC/NASD/NYSE “lexicons,” pre-defined within the software, to monitor key phrases and words that violate regulations
- Offers advanced message surveillance through natural language content analysis
- Provides the ability to customize client-defined lexicons and policies

- Flags and quarantines non-compliant messages

SafecoreMA Mailbox Manager

- Offers individual mailbox owners access and management of their mail without burdening the enterprise mail system or risking loss of critical business intelligence

Safecore Instant Messaging (IM) Archiving

- Reliably logs all IM traffic across major public, private, and enterprise IM networks
- Provides custom keyword searching
- Integrates with corporate LDAP directory information
- Automatically filters content and provides flagged message notification
- Offers message annotation and audit tracking to provide evidence of compliance

Reporting

- Audit Reports on all activity
- Custom Reports using Business Objects
- System monitoring using SafecoreEYE

SafecoreMA Flexibility

SafecoreMA is transparent to the user and supports many content sets and platforms including:

- Microsoft Exchange
- Lotus Notes
- GroupWise
- Sendmail
- Bloomberg
- Other popular e-mail services
- E-mail attachments
- IM Services, Yahoo, MSN, etc.

How It Works

SafecoreMA intercepts all inbound and outbound e-mails and instant messages as they are communicated, and routes them to a dedicated or shared "Digital Archive" at Safecore where they are retained for the company-defined archiving term which is typically between three and seven years.

SafecoreMA provides accurate, comprehensive, and real-time archival access plus sophisticated compliance review tools to identify and flag inappropriate message content.

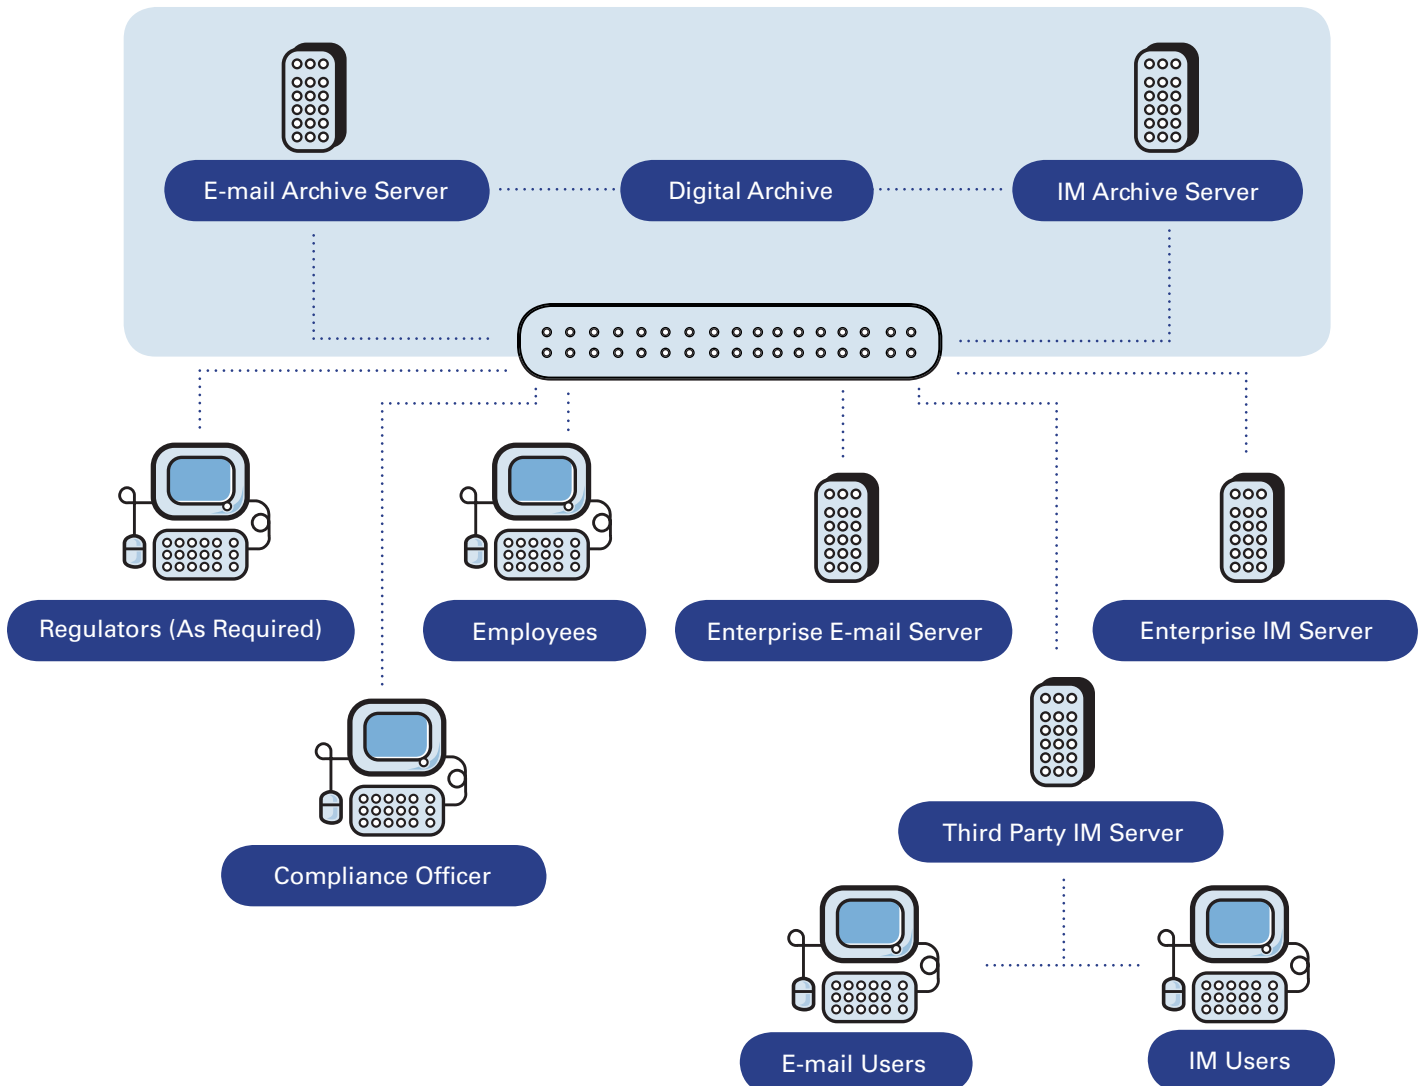

SafecoreMA can process millions of messages and archive hundreds of gigabytes per day with high availability, low-fault tolerance, and extreme resiliency.

SafecoreMA provides all regulatory documentation for compliance including:

- Third Party Letter of Undertaking
- SEC Notification
- SEC Representation Letter
- Audit Reports

Archival and eDiscovery System

SafecoreMA Compliant Storage Platform Features

- Compliant WORM (Write Once Read Many) Disk Technology (when required)
- Data Protection—Data cannot be deleted or modified until expiration date
- Self Healing—Maintains multiple copies of all data on separate servers within the system
- Multi-site Replication

Safecore Security

Safecore ensures the absolute security and integrity of our customers' business information. Our comprehensive security system includes:

- Firewalls
- Virtual Private Networking
- Data Encryption
- Security Audits
- SAS70 Datacenters
- Safe Harbor Privacy Policy

SafecorePRO's comprehensive set of services helps companies meet their regulatory and eDiscovery objectives.

- Email policy and management strategy
- Compliance Support and Consulting
- Life Cycle Management
- Data Conversion, Migration, and Destruction
